

# Rocket Science Brings Glowing Peace and Serenity to Your Own Backyard with Relaxing Realistic Robotic Fireflies

CREATIVATIONS

## Fireflies™

### **Light up Your Back Yard and Your Life**

Remember fireflies' mesmerizing glimmer, chasing their sparkle and marveling in their radiance? Time seemed to slow down and there was something hypnotic about that twinkle that made you relax, breathe and feel the expanse of the summer night. Now you can have that same feeling with a major innovative technological breakthrough--- Creativations Fireflies.

The fascination of fireflies and their effects can be found in all cultures. In fact, Aztecs used the term firefly metaphorically, meaning a spark of knowledge in a world of ignorance or darkness. Just fifteen minutes watching these amazing life-like firefly-lights dancing in the night sky, you'll relax, unwind, and who knows what sparks will be rekindled.

Creativations Fireflies mechanisms are precisely balanced to create a fluid, natural motion. It took over fifteen years of product engineering, testing and rocket science, to develop this sophisticated, high-quality patented lighting effect that is powered by micro-motors and aerodynamics.

### **Product Specifications**

|                      |                             |
|----------------------|-----------------------------|
| Total Length         | 21.5 feet / span            |
| Power Supply:        | 110 AC converted to 4.5V DC |
| Operating Temp:      | 45°F to 95°F                |
| Spectrum LEDs:       | Luciferin Yellow            |
| Microprocessor Fans: | 2400 RPM                    |
| Safety Approvals:    | UL/CUL                      |
| Warranty:            | 30 Day money back           |

### **It's All Done with Special Wires**

The random, natural movement of Creativations Fireflies is no accident. This product uses sophisticated ultra-fine-gauge wires meticulously wound together and coated in a rubberized compound to create a unique "spring tension" and random movement patterns. These wire assemblies are connected to specially-mounted intricate microprocessor fans, which are the source of movement for the Fireflies. These fans are remarkable micro-machines and are rated to operate for an unprecedented 25,000 continuous hours. So precise is their mechanism, that no more than a soft whisper of sound can be heard.

Creativations Fireflies plug into any indoor or outdoor outlet and can be easily hung indoors or along hillsides, in trees, bushes, or between two high objects in a just a few minutes. For best results, place in a dark area without interference of ambient light.

### **The Color of Creativations Fireflies**

The Creativations Fireflies utilize pure spectrum color, Light Emitting Diodes (LED's) that are custom-made to stringent electroluminescence specifications and are specifically manufactured for Creativations to produce the exact color glow and intensity of real Fireflies.

The LED's are permanent, and will never burn out or blow. Fireflies found in nature produce a very rare chemical called luciferin that causes the highly distinctive firefly glow. This same chemical has unique luminescent characteristics that have been used by NASA scientists to illuminate instrument panels used on the space shuttle.

The uses for Creativations Fireflies are limited only by your imagination -back yard picnics, weddings, commercial use by caterers, restaurants, hotels, tropical gardens, museums, romantic rendezvous, dining alfresco, only-kid-on-the-block party sensations; bringing the relaxing glow of nature into austere office environments, or even outside city dwellers' windows. No matter how you use Creativations Fireflies, you will develop a fascination for their relaxing hypnotic glow.

Creativations Fireflies elicit oohs and ahhs from guests and are only fully appreciated when experienced in person. You have nothing to lose because they come with a 30-Day money back guarantee. A vacation to that special lake or mountain where you first experienced fireflies could eat up a whole paycheck or more, however Creativations Fireflies are less than a day at the spa or a trip to a therapist with a low introductory price tag of \$98.00 (standard pricing is \$145.00).
